CURVEAUDIT AR / FIELD REVIEW SERIES

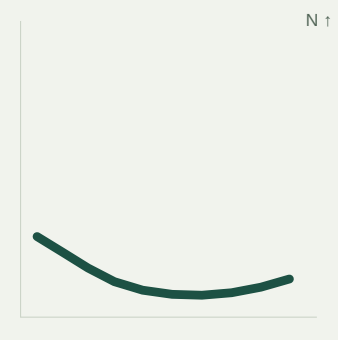
Preliminary curve audit

Magnetic Drive · Carroll County, Arkansas

REPORT CA-12742345-0-157 | 10/24/2026 | NOT FIELD REVIEWED

01 / Geometry screening

Estimated radius	91 m / 299 ft
Heading change	47° · Left in source direction
Estimated curve length	90 m
Road class	tertiary
Coordinates	36.403860, -93.718610
Screening priority	Higher



Centerline shape · north up · not a survey

02 / Evidence and missing measurements

Estimated radius 91 m; 47° heading change. Geometry-only research thresholds; no verified sign, banking, friction or crash evidence.

Quality: OSM estimate — field validation needed. Local sampled radii span 66–119 m; this is variation, not a statistical confidence interval. Posted speed: unknown. Banking, friction, grade, sign inventory, sight distance, and traffic exposure are unknown. No crash records matched to this candidate. Elevation: Not integrated.

03 / Professional field-review checklist

- Verify alignment, radius and available sight distance with suitable survey methods.
- Inventory existing curve signs, advisory plaques, chevrons, delineation, shoulders and roadside conditions.
- Measure road cross-slope; evaluate speed, pavement friction and wet-weather conditions.
- Review matched crash records and traffic exposure before selecting treatments.
- Assess signing under current MUTCD engineering criteria; consider delineation, roadside improvements or high-friction surface treatment only where field evidence supports them.

04 / Reproducibility and references

OSM way 12742345 · retrieved 10/24/2026 Central · method v1.0.0. EPSG:32615; 10 m resampling; 1–2–1 smoothing; 40 m chord circumcircle; median radius per grouped turn. Source way direction defines left/right; direction reverses with travel.

FHWA MUTCD, 11th Edition with Revision 1, December 2025 · FHWA HFST curve selection guidance

PRELIMINARY SCREENING ONLY. This report is not an engineering study, a finding that a road is unsafe, a certified advisory speed, or a determination that a treatment is required. © OpenStreetMap contributors, ODbL. County boundaries: U.S. Census Bureau.
